

## **Required Gear:**

- **Rifle.** Suitable for ranges up to 1300 yards. We will be shooting quite a bit so make sure your rifle is one that you are comfortable shooting a lot.

- **Ammunition.** 160 rounds. Make sure you have enough of one type of ammunition to shoot the whole weekend. If you try to shoot several different weights and manufacturers rounds during the weekend you will have a very difficult time hitting the targets.

- **Tactical Scope.** Your scope needs to be designed to make adjustments for the ranges we will be shooting. If your scope only has caps that unscrew and ambiguous adjustments it will be difficult for you to use it for longer ranges. Many scopes with only 1/4" adjustments will need to move about 140 "clicks" to go from 100 to 1000 yards.

- **Scope tools for zeroing.** We will have basic tools available. If possible, bring your own tools for adjusting your scope and sighting in.

- **Rifle bipod/Shooting support.** A collapsible bipod attached to your rifle will be the most convenient option. Sand bags or other support are also okay.

- **Sunscreen**

- **Warming/rain layer**

- **Notebook**

- **Pencils**

- **Water bottle**

- **Backpack**

## **Optional Gear**

- Rifle cleaning kit/tools

- Shooting mat

- Shooting bench: If you are unable to shoot from a prone (lying down) position a small shooting bench will be Okay. We don't have a lot of lateral room on the ranges for large tables.

- Lens wipes

- Spotting scope with tripod

- Rangefinder

- Ballistic app
